

DUBAI PODCAST STUDIO

Client Database — Marketing Intelligence Report

Reporting Period: March 23 – May 14, 2025 | Generated: May 15, 2025

EXECUTIVE SUMMARY

Between March 23 and May 14, 2025, the studio assistant completed a full outreach campaign across 626 client contact records. The exercise was specifically designed to gauge the impact of regional conflict and the approaching summer season on client presence and booking intent in Dubai. The data reveals a market that remains predominantly active locally, but with a notable segment of clients either currently abroad or uncertain about their return — directly informing how the studio should allocate its marketing budget and messaging for June–August.

626	294 (47.0%)	233	34
Total Records	Reached (Contact Rate)	Confirmed In Dubai	Currently Absent

1. OUTREACH PERFORMANCE

Key Findings:

- Contact rate of 47.0% (294/626) — a strong baseline for a cold-recall campaign.
- 134 numbers (21.4%) were switched off — likely clients who have temporarily or permanently left the region.
- 176 no-answers (28.1%) represent a recoverable segment via WhatsApp/SMS follow-up.
- Of those reached, 79.3% confirmed they are in Dubai, while 11.6% are currently outside the country.

2. GEOGRAPHIC DISPERSION OF ABSENT CLIENTS

Key Findings:

- The **UK dominates** as the top destination for absent clients — suggesting a strong British expat segment that travels home during the summer.
- **France and Germany** follow, confirming a significant Western European clientele.
- **Bahrain and Abu Dhabi** appearances suggest some regional displacement — these clients may return quickly and should be priority-targeted.
- **Russia, Spain, Egypt, Panama, Bali, Singapore, Morocco** all represented — the studio has a genuinely international client base.

3. OUTREACH VOLUME OVER TIME

Key Findings:

- The campaign peaked in **late March / early April** with the heaviest single-day volumes, suggesting proactive follow-up immediately after the regional conflict escalation.
- A notable **April 14 surge** (highest single-day record) likely reflects a systematic sweep of the full database.
- Activity levels in **May 2025 dropped** — indicating either saturation of the reachable pool or a shift to other tasks. Fresh outreach waves are recommended.

4. ABSENT CLIENT RETURN TIMELINE SEGMENTATION

Key Findings:

- **9 clients short-term (<1 month)** — immediate re-engagement priority. These clients are returning imminently and should receive booking incentive offers NOW.
- **2 clients mid-term (1–3 months)** — target with June/July 'book before you arrive' campaigns.
- **1 clients long-term (3+ months)** — low summer priority; nurture with newsletter content and autumn re-engagement.
- **9 clients gave no definite return date** — monitor and ping in 30–45 days.
- **1 clients indicated they are no longer based in Dubai** — consider archiving or targeting with remote/virtual studio services.
