CONFIDENTIAL — LEADERSHIP USE ONLY

DUBAI PODCAST STUDIO RECOVERY STRATEGY

Crisis Response & Revenue Recovery Plan — 2026

"The market has changed. The strategy must change with it — without abandoning what made you the leader in the first place."

MAY 2026 — VERSION 1.0

INDEX

CONTENTS

01 The Honest Diagnosis — *What is really happening*

02 Competitive Intelligence — Poddster — *The real threat, assessed clearly*

03 What Must Not Change — *Protecting the brand DNA*

04 The Three Markets to Win Right Now — *Where the revenue actually lives*

05 The Summer Strategy — Corrected — *What actually works in summer*

06 Revenue Recovery Architecture — *New offers that the team can actually deliver*

07 Paid & Organic Channel Strategy — *Where to spend and where to post*

08 Re-Activating 3,500+ Past Clients — *The cheapest pipeline you already own*

09 On Pricing — The Race You Must Not Enter — *Competing without commoditising*

10 90-Day Recovery Roadmap — *Week-by-week execution*

11 KPIs & Weekly Scorecard — *How to know if it's working*

SECTION 01

THE HONEST DIAGNOSIS

Before any strategy can work, the situation must be named accurately. There are three forces at work simultaneously, and each requires a different response.

FORCE 01 — EXTERNAL DEMAND SHOCK

The regional conflict has materially reduced international visitor volume to Dubai. This is not a marketing problem. No amount of clever advertising brings back visitors who have chosen not to travel to the region. **This force cannot be fixed. It must be navigated around.** The strategy must stop relying on visitor-dependent revenue and pivot toward audiences that are already in Dubai — or coming despite the broader climate.

FORCE 02 — SEASONAL COMPRESSION

Summer in Dubai is historically the weakest period for resident and expat activity. Expats leave for home countries. The heat keeps people indoors. Event calendars empty. This is a known, predictable pattern — and the correct response is not to fight it, but to **substitute the audience that leaves (Western expats) with the audience that arrives (Gulf nationals)**. This is the single most underused strategic insight in Dubai's hospitality and services sector.

FORCE 03 — COMPETITIVE PRICE EROSION

Competitors are cutting prices to survive. This creates pressure to follow. **Do not follow.** Price wars initiated by weaker players are a trap designed to bring the leader down to their level. A studio that cuts prices in a quality-signals market tells every prospective client that their prices were arbitrary to begin with — and that the quality claims may also be. Your Google Reviews leadership position is incompatible with being the cheapest option. They cannot coexist.

CORE STRATEGIC PRINCIPLE

The goal is not to fight on three fronts simultaneously. It is to selectively withdraw from the one front you cannot win (visitor market recovery), hold firm on the front that protects margin (pricing), and go on the offensive on the two fronts where you have genuine advantage — the resident/corporate market and the Gulf nationals summer market.

A NOTE ON THE TEAM REALITY

This strategy is built around the team you actually have — not the team you wish you had. The operators are loyal, consistent, and reliable. They are not creative directors. Every new service proposed in this document is specifically designed to be executable without creative judgment. **Consistency is your competitive advantage. Never sacrifice it chasing complexity.**

SECTION 02

COMPETITIVE INTELLIGENCE — PODDSTER

Poddster is the primary competitor in the Dubai podcast studio market. They operate at **dubai.poddster.com** with 9 studios across 4 locations: Al Barsha, Dubai Media City, Motor City, and Palm Jumeirah. Notably, none of these locations are in Business Bay — which means DPS holds a geographic monopoly on the most commercially dense address in the city.

THE DIRECT ASSESSMENT

Poddster is building a wide ecosystem at the deliberate cost of margin. They are investing in community, education, SEO content, multiple locations, and corporate enterprise sales simultaneously. This is an expensive strategy. The founder's assessment that they barely break even is likely accurate. **But "barely breaking even" does not mean irrelevant — it means they are prioritising long-term market position over short-term profit.** In a recovering market, that bet could pay off significantly. DPS must be aware of this trajectory.

WHAT PODDSTER HAS THAT DPS DOES NOT

THREAT LEVEL — HIGH

78 Blog Articles — SEO Machine

Poddster has published 78 SEO-targeted articles covering every keyword in the podcast studio space. This is a deliberate organic search strategy that quietly redirects discovery traffic away from DPS. This gap will compound over time if left unaddressed.

THREAT LEVEL — HIGH

Enterprise Corporate Portfolio

Microsoft, Amazon, PwC, Emirates NBD, Visa, Nestlé, NET-A-PORTER. 50+ global brands. 240M lifetime podcast views across their client base. This is a proven, operating B2B revenue machine that DPS currently has no equivalent to.

THREAT LEVEL — MEDIUM

PodClub + Poddster Academy

THREAT LEVEL — MEDIUM

Anghami Distribution Integration

Community membership and bi-monthly masterclasses create retention and referral loops that pure transactional studios cannot match. Once a creator is embedded in PodClub, switching feels like a social cost, not just a commercial one.

Anghami is the dominant audio streaming platform across the Arab world. Poddster offers promotional placement (Homepage Feature, Search Boost, Push Notifications) at 440–730 AED. For Arabic-language content creators, this is a distribution layer DPS cannot currently match.

THREAT LEVEL — LOW

Multi-Location Coverage

4 locations across Dubai. For clients in Al Barsha or Motor City, Poddster is simply closer. DPS cannot address this without capital investment in new locations. The response is to make Business Bay proximity a premium argument, not to try to match coverage.

NOTE

Luxury Chauffeur Service — 500 AED

A premium add-on that signals confident brand positioning. Poddster is not afraid to charge for experience. This is a pricing psychology signal worth noting — they believe their clients will pay for convenience well above the session price.

WHERE DPS WINS — NON-NEGOTIABLE ADVANTAGES

ADVANTAGE	DPS	PODDSTER	STRATEGIC IMPLICATION
Google Reviews	#1 in the region	Strong but not #1	Most trusted studio in the market — protect at all costs
Base hourly rate	450 AED	490 AED	DPS is cheaper AND better reviewed. Use this.
Business Bay location	7 studios on-site	Not present	Geographic monopoly for DIFC/BB corporate market
Operating hours	Until 11 PM	Until 10 PM	An hour later — relevant for evening corporate and creator bookings
Booking simplicity	"Record and leave"	Complex ecosystem	Busy professionals want zero friction. DPS delivers it.
Creator calibre	Yomi Denzel, Oussama Amar, Luke Belmar, Mike Thurston	Strong but different	International creator credibility, particularly French-speaking market

THE TWO DEFENSIVE MOVES AGAINST PODDSTER'S MOAT

1

Close the SEO Gap — 4 Articles Per Month, Outsourced

At 78 articles, Poddster is winning the organic search battle invisibly. DPS does not need to match this volume — but it needs to establish presence on the highest-value keywords before they are completely owned. Budget: 500–800 AED per article, outsourced to a freelance writer briefed on DPS positioning. 4 articles/month = 2,000–3,200 AED. This is the cheapest long-term competitive defence available.

2

Add Podcast Distribution as a 150 AED Add-On

Poddster charges 440–730 AED for Anghami promotional services. DPS can offer basic multi-platform distribution submission (Spotify, Apple Podcasts, Anghami) as a 150 AED add-on — technically simple, no creative judgment required, and it directly undercuts Poddster's distribution offer. Operators upload the final audio to Buzzsprout or Anchor, submit to directories, deliver the live links. Total operator time: 20 minutes per client.

SECTION 03

WHAT MUST NOT CHANGE

Before addressing what needs to shift, it is equally important to be explicit about what must be protected. These are not negotiable — touching them would cost more than the revenue they might temporarily generate.

PROTECT

The #1 Google Reviews Position

You are number one in the region, not just Dubai. This is your most durable competitive moat. Every decision must be filtered through this question: "Does this risk a negative review?" If yes, don't do it.

PROTECT

The "Record and Leave" Brand Promise

Clients chose you because you deliver without drama. Reliability over creativity. "You come any day of the week and always get what we promise." This is rare and valuable. Don't abandon it to compete with Poddster's community model.

PROTECT

The Price Floor

PROTECT

Standardised Service Delivery

450 AED/hour for video + audio is already competitive for Business Bay with your equipment. Discounting the base rate signals weakness and erodes brand perception. Do not lower it. Create different packages instead.

Customisation creates demanding clients and inconsistent reviews. The decision to stay in the mass-market, standardised model was correct. Any new service must be template-based and repeatable.

The Poddster Trap: Do not attempt to build a community to compete with Poddster. Your venue is not sized for it, your audience DNA is not built for it, and your team is not resourced for it. Poddster's website is currently unreachable — their model may not be as strong as it appears. Competitors in the community space often sacrifice margin for engagement. You chose margin. That was correct.

SECTION 04

THE THREE MARKETS TO WIN RIGHT NOW

The visitor market is diminished for the foreseeable future. The strategy must pivot to the three segments that are present, active, and spending regardless of the regional climate.

MARKET 01 — DUBAI RESIDENTS: COACHES, CONSULTANTS, ENTREPRENEURS

Dubai has a large, permanent population of coaches, business consultants, and entrepreneurs who are building personal brands. They are not visiting — they live here. They need content every week. This segment is almost entirely immune to the visitor market decline. **This is the most stable, recurring revenue opportunity available to you right now.**

- → Target via LinkedIn and Instagram with messaging about consistent, professional podcast production
- → Offer a monthly recording membership (detailed in Section 06) to convert one-time clients into predictable monthly revenue
- → Leverage the coaching vertical page you already have — it needs updating and a direct call to book a recurring package

MARKET 02 — CORPORATE & B2B

Companies in Business Bay and DIFC do not travel. They are open. They produce content year-round. A corporate client on a monthly programme is worth ten times a one-off creator booking. **This segment requires a different sales approach — direct outreach, not digital ads — but it is the highest-value segment in the building.**

- → Target: Communications Directors, PR Managers, CMOs at mid-to-large companies in Business Bay and DIFC
- → Channel: LinkedIn direct outreach + email
- → Offer: A "Corporate Podcast Programme" package (detailed in Section 06)
- → Proof: The fact that major international figures have recorded at your studios is powerful for corporate buyers who value credibility signals

MARKET 03 — THE FRENCH-SPEAKING CREATOR ECOSYSTEM

Yomi Denzel and Oussama Amar — two of the most followed French-speaking entrepreneurs in the world — have recorded at your studios. The French-speaking creator economy spans France, Morocco, Tunisia, Algeria, Ivory Coast, Senegal, and beyond. Many of these creators visit Dubai specifically for content and business. **This is a market that can be activated at near-zero cost through the relationships you already have.**

- → One social post from either Yomi Denzel or Oussama Amar mentioning the studio reaches millions of exactly the right audience
- → Create a French-language version of the booking page or at minimum French-language ads targeting this demographic
- → Target French-speaking creator communities on Instagram and YouTube with awareness content featuring these names

SECTION 05

THE SUMMER STRATEGY — WHAT ACTUALLY WORKS

CORRECTED ASSESSMENT

The initial assumption that Gulf nationals travel to Dubai in summer was wrong — client intelligence from direct contact with the studio's own Saudi and Kuwaiti clients confirms they are travelling to Bali, Europe, and Thailand during the summer months, not staying in the region. **The summer strategy must be built around audiences that are genuinely present, not assumed ones.**

WHO IS ACTUALLY IN DUBAI IN SUMMER

The summer audience is smaller but real. It consists of three groups:

- → **Long-term residents who cannot or do not travel** — professionals in their first or second year in Dubai, people with ongoing business commitments, those who simply stay. This group is present, under-marketed to, and more accessible than ever because the city is quieter.
- → **Corporate teams with Q3 content deadlines** — companies don't go on summer holiday. Their communications and marketing teams still have deliverables. A summer slow-down for consumers is not a slow-down for B2B content production.
- → **International visitors who still come despite the climate** — not in volume, but in quality. A creator who chooses to visit Dubai in July despite the heat is highly motivated. They are coming specifically to work, not for leisure. These are the highest-intent visitors you will see all year.

THE SUMMER POSITIONING PLAY

Turn the slow season into a selling point. "Dubai is quieter in summer — which means the studio is too. Priority booking, faster availability, no waiting." Frame low utilisation as an exclusive experience, not a sign of weakness. This is not dishonest — it is true. And it speaks directly to the professional creator who values access and efficiency over energy and buzz.

SUMMER MOVE 01

B2B Summer Sprint

Push the corporate outreach harder in June–August precisely because decision-makers are less distracted by events and social obligations. Summer is when corporate buyers have more capacity to respond to a well-timed outreach.

SUMMER MOVE 02

Membership Conversion Drive

Offer a summer membership sign-up bonus — "Sign up for a 3-month membership before July 1 and get the first month at 20% off." Lock in recurring clients before the slow season, not after it. The discount is recovered within the second month.

SUMMER MOVE 03

Past Client Re-Engagement

SUMMER MOVE 04

SEO Content Acceleration

"Summer is the perfect time to finally launch that podcast. The studio is available — are you?" A single WhatsApp message to all past clients who booked more than 6 months ago. Low cost, direct, timely.

Publish aggressively in summer. Blog articles indexed in June–August will be live and ranking when the September-October peak season returns. Summer's slower business pace is the window to build the SEO foundation that pays off in Q4.

SECTION 06

REVENUE RECOVERY ARCHITECTURE

Three principles govern every new offer below. If a proposed service fails any one of them, it does not belong in the lineup.

- → **Deliverable by the current team without creative judgment** — no offer should rely on the operator deciding what looks or sounds good
- → **Standardised and repeatable** — the same inputs produce the same output every time, protecting the Google Reviews position
- → **Additive to cash flow, not destructive to margin** — new offers must generate revenue above the cost of delivery

NEW OFFER 01 — THE MONTHLY RECORDING MEMBERSHIP

This is the most important single change you can make. Convert irregular bookings into predictable monthly revenue.

TIER	HOURS / MONTH	PRICE (AED)	TARGET CLIENT	EXECUTION NOTES
Starter	4 hours (2×2h sessions)	1,600 / month	Solo coach, beginner podcaster	Same studio, same operator each time
Creator	8 hours (4×2h sessions)	2,800 / month	Active creator, consultant	Priority booking, guaranteed availability

TIER	HOURS / MONTH	PRICE (AED)	TARGET CLIENT	EXECUTION NOTES
Pro	16 hours (8×2h sessions)	5,000 / month	Regular show, small brand	Dedicated studio if requested

The membership is billed monthly via Stripe or manual invoice. Hours do not carry over month-to-month — this prevents a single power user from blocking future bookings. The operator does not change per session, which increases the quality consistency that protects reviews.

> **Why this works for the team:** A member client is a known client. The operator knows their setup preferences, their voice, their camera angle. Zero learning curve per session. This actually makes the operator's job easier and the output more consistent.

NEW OFFER 02 — AI REELS ADD-ON (THE RIGHT WAY TO IMPLEMENT IT)

The owner correctly identified this as an opportunity. The obstacle — team creativity and taste — is solved by removing the human creative decision entirely. **The algorithm decides, not the operator.**

The tool: **Opus Clip** (or Descript). These AI tools automatically identify the most engaging 60–90 second moments from a session recording and generate short-form clips with captions. The operator uploads the file. The AI selects and cuts. The operator exports. No taste required.

ADD-ON	PRICE (AED)	DELIVERABLE	TURNAROUND	TEAM TASK
AI Reels Pack — Standard	250	5 AI-selected short clips with auto-captions	24–48 hours	Upload file to Opus Clip. Download outputs. Send link.
AI Reels Pack — Extended	450	10 clips + 1 full-episode vertical cut	48 hours	Same workflow. More output files.

> **This is not editing. Do not call it editing.** Call it "AI Reels" or "Social Clips Pack." Clients who understand AI content production will value it correctly. Clients who don't understand it will be pleasantly surprised by the output quality. It is priced to be an impulse add-on at checkout — not a premium service requiring a separate conversation.

NEW OFFER 03 — CORPORATE PODCAST PROGRAMME

A packaged offering specifically for companies rather than individuals. Simple, standardised, and high-value.

COMPONENT	DETAIL
Duration	Monthly retainer, minimum 3-month commitment
Hours included	8 hours/month (4 episodes of 2 hours each)
Price	5,500–7,000 AED/month depending on studio and requirements
Differentiator	Fixed studio, named account contact, priority scheduling, monthly session summary report
Add-on available	AI Reels Pack per session (+250 AED per episode)

NEW OFFER 04 — EXPRESS RAW FILE DELIVERY

Currently raw files are delivered in 2–3 days. This creates friction for creators who operate on tight content schedules. A simple tiered delivery model converts this constraint into revenue.

- → **Standard delivery:** 1–2 days — included in all packages (no change)
- → **Express delivery (same day, within 4 hours):** +150 AED — operator transfers directly at end of session via high-speed upload link

This requires no creative skill. It requires one operator to stay at the machine for 30 minutes post-session to ensure upload completion. At 150 AED per upsell, and if 20% of sessions opt in, it adds meaningful revenue with zero additional overhead.

WHAT NOT TO ADD

> **Do not add:** Full creative editing packages beyond what you currently offer, podcast strategy consulting, social media management, or any service that requires the team to exercise creative judgment on behalf of the client. Every time you have offered this, demanding clients have followed. The mass-market, consistent-delivery model is the asset. Do not compromise it.

SECTION 07

PAID & ORGANIC CHANNEL STRATEGY

With a reduced team and tighter budget, channel selection must be ruthless. Do not spread across all platforms. Do fewer things significantly better.

CHANNELS — PRIORITY ORDER

GOOGLE ADS

Priority 1 — Immediate, high-intent traffic. "Podcast studio Dubai," "record podcast Dubai," "video podcast studio business bay" are searched by people ready to book. This is the most direct path from ad spend to booking confirmation. Budget: 3,500–5,000 AED/month. Start here before any other paid channel.

GOOGLE REVIEWS

Priority 1 — Protect the moat actively. You are #1 in the region. Every session should end with a verbal request for a Google review. Train every operator to say it naturally at the end of each session. This is your most powerful marketing asset and it costs zero to maintain — only effort.

SNAPCHAT ADS

Priority 1 (June–September only) — Gulf nationals summer play. Arabic-language ads targeting Gulf national visitors in Dubai. This is uncontested territory in your category. Budget: 2,000–3,000 AED/month across summer. Measure cost per booking inquiry. If it works in June, scale in July.

INSTAGRAM

Priority 2 — Brand presence and booking conversion. Studio footage, equipment walkthroughs, "behind the session" content. 3 Reels per week minimum. The visual quality of your studios sells itself — the operator just needs to point the phone at the room. No creative direction required.

LINKEDIN

Priority 2 — B2B and corporate pipeline. Direct outreach to Communications Directors, CMOs, and PR managers in Business Bay and DIFC. 20 personalised messages per week. Content: "How Dubai's top professionals are using podcasts to build authority." This is the right audience, in the right building, and LinkedIn reaches them directly.

WHATSAPP

Priority 2 — Re-engagement of past clients. Your most underused channel for the most valuable audience you have — people who have already paid you. A single WhatsApp broadcast to past clients costs nothing. Results can be immediate. This is covered fully in Section 08.

TIKTOK

Priority 3 — Discovery and reach. Valuable but lower priority given team constraints. If content is already being shot for Instagram, repurpose it to TikTok. Do not create TikTok-specific content with the current team size.

WHAT TO POST — THE NO-CREATIVITY RULE

Given team limitations, all social content must require zero creative judgment. Every piece of content falls into one of these five categories:

CONTENT TYPE 01

Studio Footage

Point a phone at the studio before/during a session. Cameras. Lights. Microphones. The room sells itself. No script, no concept, no creative direction needed.

CONTENT TYPE 02

Client Permission Clips

At the start of each session, ask the client if you may share a 10-second clip on Instagram. Most will say yes. One operator records 10 seconds. Upload same day.

CONTENT TYPE 03

Equipment Features

"This is the same microphone Joe Rogan uses." "These cameras are Netflix-approved." Product facts delivered directly. No styling needed.

CONTENT TYPE 04

Review Reposts

Screenshot every 5-star Google review and post it to Instagram Stories. Costs 2 minutes. Serves as constant social proof reinforcement.

MONTHLY AD BUDGET RECOMMENDATION

CHANNEL	BUDGET (AED/MONTH)	PERIOD	EXPECTED OUTCOME
Google Search Ads	4,000–5,000	Year-round	High-intent bookings, fastest ROI
Snapchat (Arabic)	2,500–3,500	June–September	Gulf national visitor market
Meta (Instagram)	2,000–3,000	Year-round	Brand awareness, creator market
LinkedIn (B2B)	1,500–2,500	Year-round	Corporate pipeline, agency relationships

CHANNEL	BUDGET (AED/MONTH)	PERIOD	EXPECTED OUTCOME
Total	**10,000–14,000**		

SECTION 08

RE-ACTIVATING 3,500+ PAST CLIENTS

You have 3,500 people who have already paid you, already trust you, and already know how to book. This is the most underused asset in the entire business. A single outreach campaign to this list — executed this week — will generate bookings before any ad campaign delivers a single click.

THE WHATSAPP BROADCAST — THIS WEEK

Every past client who provided a phone number can receive a WhatsApp message today. The message should be short, personal, and not feel like a mass broadcast.

TEMPLATE — WHATSAPP BROADCAST (ENGLISH)

Hey [first name],

It's been a while since we saw you at Dubai Podcast Studio. Wanted to reach out personally — we've added a few new things including an AI Reels package and monthly recording memberships that a few of our regulars have been using.

If you're thinking about recording again, reply here or head to the link and book directly — we'll make sure you get the same studio you know.

[booking link]

TEMPLATE — WHATSAPP BROADCAST (ARABIC VERSION)

مرحباً [الاسم]،

لقد أضفنا خدمة جديدة لمقاطع Reels وددنا التواصل معك — التسجيل وعضوية الذكاء الاصطناعي بالشهرية. إذا كنت تفكر في التسجيل مجدداً، احجز مباشرة عبر الرابط:

[booking link]

THE REFERRAL PROGRAMME — LAUNCH NOW

Formalise what is currently informal. Every past client who refers a new paying client earns 200 AED studio credit. This costs you 200 AED only when a paying client arrives — it is zero-risk marketing.

- → Announce via WhatsApp broadcast to the full past client list
- → Add a referral block to the booking confirmation email
- → Include the offer on the Google Review request — "Review us and share your unique link to earn 200 AED credit"
- → Expected: 3,500 clients × 5% activation = 175 referrals in the first 30 days. Even at 50% conversion that is 87 new bookings from a single message.

THE GOOGLE REVIEW PUSH — THIS WEEK

You are #1 in the region on Google Reviews. This position must be actively defended and grown during the downturn — it is one of the primary factors driving organic bookings. Take two specific actions this week:

- → **WhatsApp request to all past clients:** "We're working hard to remain the #1 podcast studio in the region — a Google review from you would mean everything to us." Include the direct review link. Target: 100+ new reviews within 30 days.
- → **Verbal at every session end:** Every operator ends every session with: "If you enjoyed today, we would really appreciate a Google review — it takes 30 seconds and helps us a lot." Not pushy. Genuine. Train this into the team's standard close.

SECTION 09

ON PRICING — THE RACE YOU MUST NOT ENTER

THE PRICING PRINCIPLE

You are the leader. Leaders do not price-match struggling competitors. When weaker players lower prices to survive, they are signalling desperation — not value. If you match them, you tell the market that your higher prices were unjustified. You will never recover that perception.

WHAT YOU CAN DO INSTEAD OF LOWERING PRICES

1

Create a True Entry Point

A first-time client "Welcome Session" — 1 hour video + audio for 350 AED (vs 450 standard). Available once per new client only. This feels like a discount without diluting the ongoing rate. New clients experience the studio at lower risk. Conversion to repeat bookings at full rate should be high given the product quality.

1

Increase Perceived Value, Not Discounts

Rather than reducing price, increase what 450 AED includes — add the AI Reels Pack Standard (250 AED value) as a free inclusion on all 2-hour+ bookings for a limited 60-day period. The client perceives more value. You pay only the marginal cost of running Opus Clip. The hourly rate is untouched.

2

Summer Rate — Gulf Nationals Only

A 15% discount exclusively for Gulf national ID holders (Saudi, Kuwaiti, Emirati, Bahraini, Qatari) on first sessions — June through August. Segment-specific, time-limited. Does not impact the rate for other clients. Shows cultural awareness and activates the summer market directly.

2

Never Publish "Promotional" Pricing Publicly

Discounts for specific campaigns, segments, or first-time offers should live on dedicated landing pages — not on the main booking page. The main page must always show full pricing. If a prospect finds your offer through a specific campaign, the discounted page applies. Everyone else sees the standard rate.

3

On the Editing Price (1,000 AED/hour)

This is the most price-sensitive item in your lineup. At 1,000 AED/hour with a 4–6 business day turnaround, clients perceive it as expensive and slow. The AI Reels Add-On (250–450 AED) is strategically positioned to absorb the

demand for quick social content at a much lower price point — protecting the premium editing product for clients who genuinely need full-episode production quality.

SECTION 10

90-DAY RECOVERY ROADMAP

Phase 1 — Stop the Bleeding

Days 1–30

CASH FLOW FIRST

WEEK 1 — IMMEDIATE REVENUE ACTIONS

- → Send WhatsApp broadcast to all past clients with re-engagement message and booking link
- → Launch Google Review push — WhatsApp request to past clients + verbal close trained into every session
- → Launch Google Search Ads — 4,000 AED/month — "podcast studio Dubai" keyword set
- → Add AI Reels Add-On to booking page as an optional extra (250 AED / 450 AED)
- → Train all operators on the Opus Clip workflow — upload, auto-generate, export, send. One afternoon training session.

WEEK 2 — OFFERS AND ACTIVATION

- → Launch the Monthly Recording Membership (Starter, Creator, Pro tiers) on the website
- → Email + WhatsApp to past clients announcing the membership — target 5 sign-ups in first 30 days
- → Launch the Referral Programme — 200 AED credit per referred booking — announce to full client base
- → Begin LinkedIn outreach — 20 personalised messages per week to B2B targets in Business Bay / DIFC

WEEK 3 — SUMMER PREPARATION

- → Brief and produce Arabic-language ad creative for Snapchat — Gulf national summer targeting
- → Create a "Gulf Creator Summer" landing page or section on the website in Arabic
- → Design the "Gulf National First Session" offer page (private URL, not on main nav)
- → Begin Instagram posting cadence — 3x/week, studio footage only, no creative direction required

WEEK 4 — CORPORATE PIPELINE

- → Produce a 1-page Corporate Podcast Programme brief (PDF) for direct B2B outreach
- → Reach out to 3 PR agencies in Dubai with partnership and volume-booking proposal
- → Offer a free "studio experience" session to 2 corporate prospects — once they see the space, conversion is high
- → Review Week 1 Google Ads — pause underperforming keywords, scale clicks-to-booking terms

Phase 2 — Build the Summer Revenue Bridge

Days 31–60

SUMMER ACTIVATION

SNAPCHAT SUMMER CAMPAIGN

- → Launch Snapchat Arabic ads targeting Gulf nationals in Dubai — budget 2,500 AED/month from June 1
- → Monitor cost per booking inquiry — if below 150 AED, scale to 5,000 AED/month in July
- → Produce 3 Arabic-language Instagram Reels targeting Gulf creators — studio tour, equipment showcase, booking walkthrough

MEMBERSHIP & CORPORATE SCALE

- → Target: 8 active monthly memberships by end of Day 60
- → Target: 1 confirmed Corporate Podcast Programme client by end of Day 60
- → Follow up with all LinkedIn prospects from Phase 1 — second touchpoint with case study or testimonial

FRENCH-SPEAKING MARKET ACTIVATION

- → Reach out directly to Yomi Denzel and Oussama Amar management — propose a simple affiliate arrangement (10% on referred bookings) or ask for a single social post
- → If approved: prepare a dedicated French-language landing page for their audience
- → Target French-speaking creator communities on Instagram with content featuring these names (with permission)

OPTIMISATION

- → Review full May performance — bookings by source, revenue by package, AI Reels add-on attachment rate
- → Cut any channel delivering below 5x ROAS — reallocate to top performers

- → Collect 5 new written testimonials from membership clients — update website and Google profile

Phase 3 — Stabilise and Scale

Days 61–90

BUILD RESILIENCE

RECURRING REVENUE TARGET

- → Target: 12 active monthly memberships — generating 33,000–45,000 AED monthly recurring regardless of visitor levels
- → Target: 2 corporate programme clients — generating 11,000–14,000 AED monthly recurring
- → Combined floor: 44,000–59,000 AED/month before a single walk-in booking

SUMMER PEAK CAPTURE

- → July is the peak Gulf nationals month in Dubai — maximum Snapchat and Instagram Arabic budget
- → Run "Summer Closer" campaign: last 10 spots remaining at Gulf Creator rate — urgency messaging
- → Capture testimonials and studio content from Gulf creator clients — repurpose for next year's summer campaign

POST-SUMMER PREPARATION

- → September is the return of Dubai's expat and event season — prepare a "Back to Business" campaign for September 1 launch
- → Review all corporate proposals sent in Phase 1–2 — recontact with updated proposal and Q4 availability
- → Brief Q4 strategy based on real performance data from 90 days

SECTION 11

KPIS & WEEKLY SCORECARD

With a team of 6 and a recovery mandate, measurement must be simple, weekly, and ruthless. These are the only numbers that matter during the recovery phase.

65%+	12	2+	5×
STUDIO UTILISATION TARGET — DAY 90	ACTIVE MONTHLY MEMBERSHIPS — DAY 90 TARGET	CORPORATE PROGRAMME CLIENTS — DAY 60	MINIMUM ROAS ON ALL PAID CHANNELS

THE WEEKLY REVIEW — 30 MINUTES, EVERY MONDAY

METRIC	HOW TO MEASURE	ACTION TRIGGER
Total sessions booked (week)	Booking system	If below prior week, activate WhatsApp broadcast
Revenue by package type	Booking system / invoice	Shift next week's messaging to best-performing offer
AI Reels add-on attachment rate	Count of add-on bookings	If below 15%, add it as a popup at checkout
Google Reviews count + rating	Google Business Profile	If any 3-star or below, respond within 24 hours
Google Ads cost per booking inquiry	Google Ads + booking system	If above 200 AED, pause low-performing keywords
Monthly membership sign-ups (cumulative)	Manual tracking	Progress toward 12-membership target
Referral bookings (weekly)	Ask at booking: "How did you hear about us?"	If referrals below 5/week, resend referral programme message

THE ONE NUMBER THAT MATTERS MOST RIGHT NOW

Monthly Recurring Revenue (MRR) from memberships and corporate programmes. Every other metric is a leading indicator. MRR is what tells you whether the business has a stable floor or is still dependent

on walk-in traffic. **The target is to build a floor of 44,000 AED/month in predictable recurring revenue within 90 days.** Above that floor, every walk-in booking is upside, not survival.

SUMMARY

THE 10 MOVES — PRIORITY ORDER

1

WhatsApp broadcast to 3,500+ past clients — this week

Re-engagement + referral programme + Google Review request. This costs zero and will generate bookings before any paid campaign goes live. Execute before anything else.

2

Launch Google Search Ads immediately

4,000–5,000 AED/month targeting high-intent search terms. Fastest path from budget to booking.

3

Add the AI Reels Add-On to every booking this week

250 AED attached to 2h sessions. Train operators on Opus Clip in one afternoon. Immediate revenue uplift on existing bookings.

4

Launch the Monthly Recording Membership

3 tiers: 1,600 / 2,800 / 5,000 AED/month. Announce to past client list. Target 5 sign-ups in 30 days. This is the foundation of revenue resilience.

5

Begin Arabic Snapchat Summer Campaign — June 1

Target Gulf national visitors in Dubai. This is uncontested territory. Budget 2,500 AED/month. Scale if it performs. This is the summer revenue bridge.

6

Launch B2B LinkedIn outreach — 20 messages/week

Target Communications Directors and CMOs in Business Bay/DIFC. Offer a free studio experience session. The first corporate client pays for the cost of three months of outreach.

7

Reach out to Yomi Denzel and Oussama Amar management

Propose an affiliate arrangement or ask for a single social post. This is the highest-leverage marketing asset you are currently not using.

8

Protect the Google Reviews #1 position actively

Verbal close at every session. WhatsApp request to all past clients. Respond to every review within 24 hours. This is your primary organic acquisition channel — never neglect it.

9

Do not lower the base hourly rate

Create entry points (Welcome Session at 350 AED, AI Reels as value-add) but never discount the standard rate publicly. You are the leader. Price accordingly.

10

Run a 30-minute Monday review every week

Total sessions, revenue by package, add-on attachment rate, Google Reviews count, ad ROAS, membership count. These 7 numbers tell you everything you need to know about whether the strategy is working.
