EXECUTIVE SUMMARY

Between March 23 and May 14, 2025, the studio assistant completed a full outreach campaign across 626 client contact records. The exercise gauged the impact of regional conflict and the approaching summer season on client presence and booking intent in Dubai. The data reveals a market that remains predominantly active locally, but with a notable segment currently abroad or uncertain about their return — directly informing how the studio should allocate its marketing budget for June–August.

1. OUTREACH PERFORMANCE

Key Findings:

- Contact rate of 47.0% (294/626) — strong for a cold-recall campaign.
- 134 numbers (21.4%) were switched off — likely clients who have temporarily or permanently left the region.
- 176 no-answers (28.1%) — recoverable via WhatsApp/SMS follow-up.
- Of those reached, 79.3% confirmed in Dubai; 11.6% currently outside the country.

2. GEOGRAPHIC DISPERSION OF ABSENT CLIENTS

Key Findings:

- The UK dominates — strong British expat segment travelling home for summer.
- France and Germany follow, confirming a significant Western European clientele.
- Bahrain and Abu Dhabi are regional relocations — these clients can return quickly; priority-target them.
- Russia, Spain, Egypt, Panama, Bali, Singapore, Morocco all present — genuinely international client base.

3. OUTREACH VOLUME OVER TIME

Key Findings:

- Campaign peaked in late March / early April — proactive response immediately after the regional conflict escalation.
- April 14 is the single highest volume day — reflects a systematic full-database sweep.
- May activity dropped — reachable pool saturated. A fresh outreach wave is now recommended.

4. ABSENT CLIENT RETURN TIMELINE

Key Findings:

- 9 short-term returnees (<1 month) — contact them NOW with a booking incentive.
- 2 mid-term (1-3 months) — target with a June/July 'book before you arrive' campaign.
- 1 long-term (3+ months) — low summer priority; nurture via email for autumn re-engagement.
- 9 gave no definite date — re-ping in 30-45 days.
- 1 indicated they are no longer Dubai-based — consider archiving or targeting with remote/virtual services.
