

Expert Conclusion & Call to Action

Dubai Podcast Studio | Client Outreach Campaign | March – May 2025

937	311	236	206	42
Clients Contacted	Answered 33.2%	In Dubai 75.9%	Never Called	Currently Absent

HOW CLIENTS WERE CONTACTED

Your assistant conducted a **fully manual, one-to-one phone outreach campaign** across 937 client records over 7 weeks — no automation, no bulk messaging, no shortcuts. The heaviest push was **March 25 (110 calls in a single day)**, triggered by the regional conflict escalation, with a second sweep on **April 14**. Activity tapered through May as the reachable pool was exhausted — yet **206 records (22%) were never contacted at all**.

THE VISIBLE TREND

Three clear signals emerge from the data:

- 1 — The market is holding.** 75.9% of everyone reached confirmed they are still in Dubai. The conflict created fear, not exodus.
- 2 — The summer exodus is real but manageable.** Only 42 clients confirmed they are abroad — mostly UK and France expats heading home seasonally. This is a predictable annual pattern, not a crisis.
- 3 — The biggest problem is internal.** 152 phones off signals the conflict impact. But 206 records were *never called* — that is an untapped opportunity inside your own spreadsheet, not a market failure.

CALL TO ACTION — 3 PRIORITIES ONLY

1

CALL THE 206 UNTOUCHED CLIENTS — THIS WEEK

No strategy needed. No budget required. Just call them. Some will book immediately. This is your fastest, cheapest revenue opportunity right now.

2

SEND A PERSONAL WHATSAPP TO EVERY RETURNING CLIENT

5 clients returning imminently + 4 within 1–3 months = 9 warm leads you already know by name. One message, one offer: "Welcome back, your studio is ready."

3

LOCK IN YOUR 236 IN-DUBAI CLIENTS BEFORE JULY

Stop chasing the phone-off list. A loyalty pack or summer bundle locks in revenue before the real slowdown hits. Retention is always cheaper than acquisition.

BOTTOM LINE

Your studio is in a stronger position than the fear suggests. The conflict created anxiety, not exodus. Summer is the real threat — and it is entirely manageable if you act on your own database **before spending a single dirham on ads.**
